Complete Portfolio Documentation Winter 2023

**Make sure to scroll to the end to see the rubric.

Your name: Brandon Goh
Link to your deployed site: https://crunchiumo.github.io/SI339project/main.html
Link to your Github repository: https://github.com/crunchiumo/SI339project

1) How do you indicate the current page WITHIN the links in the navigation? (Make sure you are not using just color)

2) Is "Skip to Content" available on every page - It should be hidden on the page load and appear on the first tab.

3) Which elements use grid and which pages are these elements on? How did you use grid differently from the homework? Why did you use the number of columns/rows? Did you use Inspect Element to check that removing **display: grid** changes the page? (Include screenshot if desired.)

4) Which elements use flex and which pages are these elements on? How did you use flex differently from the homework? Which different supporting properties did you use, e.g flex-direction, flex-wrap, justify, align? Did you use Inspect Element to check that removing **display: flex** changes the element? (Include screenshot if desired.)

5) What did you do to make your pages particularly visually appealing? How did you come up with your color scheme? Tell us more about your font choices, image editing, etc.   I am sure there are things that you did that we can't easily see.

6) Tell us about your Responsive Design. What is your tablet breakpoint and why did you pick that particular value for your first media query? What is changed in the layout? What is changed in the styling? *How did these changes improve the page*? Were you careful to not duplicate unnecessary code?

7) Tell us about your Responsive Design. What is your desktop breakpoint and why did you pick that particular value for your first media query? What is changed in the layout? What is changed in the styling? *How did these changes improve the page*? Were you careful to not duplicate unnecessary code?

8) Include a screenshot of **all** pages validating on aXe and Wave. Make sure that we can see the URL in the screenshot.

9) What *extra* steps you took to ensure that your site addresses accessibility, diversity and inclusion. Tell us about your pictures, topic, or additional manual testing.

10) Check your site for other issues. Are you using the html5reset style stylesheet? Did you remember to include the viewport meta tag? Do you have console errors? Did you use proper naming conventions (no uppercase letters or spaces, mnemonic file names, etc.)

11) Please write about any "Extras" that you did – what did you do above and beyond the required? **(This is crucial because we can't always "see" all of the extras that you did)**

12) (Optional) If you worked with a partner this is where you and your partner should add your small write-up describing your specific contributions.

Fill in your expected score and we will use it as a starting point. (If you give a lower score than we think you deserve we may raise it. If you give yourself credit for doing something you didn't complete we will make an extra deduction.)

Criteria	Your Expected Score
The navigation must clearly display the current page within the nav element. As you visit each page, point out how the navigation bar changes to clearly indicate which page you are currently viewing. Don't forget, color alone should never be used to signify important information.	/5
Each page should contain a main section that can be reached using a Jump to Content option with the first tab on the page. Main must be after the navigation. Make sure to check that "Skip To Content" works on EVERY page.	/5
Grid - used effectively. What elements use grid and which pages are these elements on? How did you use grid differently from the homework?	/15
Flex - used effectively. What elements use flex and which pages are these elements on? How did you use flex differently from the homework?	/10
Visually appealing What did you do to make your page particularly appealing? How did you come up with your color scheme? Tell us more about your font choices, image editing, etc. I am sure there are things that you did that we can't easily see.	/25
Tell us about your Responsive Design. What is your tablet breakpoint and why did you pick that particular value for your first media query? What is changed in the layout? What is changed in the styling ? Were you careful to not duplicate unnecessary code?	/10

Tell us about your Responsive Design. What is your desktop breakpoint and why did you pick that particular value for your second media query? What is changed in the layout? What is changed in the styling ? Were you careful to not duplicate unnecessary code?	/10
Validation	/10
Accessibility, diversity and inclusion. Include a summary of the steps you took to ensure that your site addresses accessibility, diversity and inclusion.	/10
"Extras" – What did you do above and beyond the required?	/25
